Software + Services

We simplify finance, accounting, and HR so that everyone at your school can focus on what matters most — serving students and families.

Built by School Leaders, for School Leaders.

Simplifying Finance, Accounting, and HR so you can focus on what matters most — serving students and families.

Funding the Future: A Facilities Capital Framework

Our team has direct experience supporting facilities projects, ranging from retrofits to ground-up construction. We know that securing the right capital mix is one of the most critical decisions a school leader makes.

Whether you are planning a multi-year capital campaign, weighing the immediate leverage of bank debt, or exploring a hybrid approach, your financial strategy must protect your operational health.

Our Funding the Future service add-on is tailored to your school's current balance sheet, offering a board-ready analysis of your financing options so you can grow with confidence.

The Donor Confidence Suite: Promoting Your Philanthropy

Building and retaining your philanthropic community requires more than just a compelling ask. It requires credibility. With this add-on service you'll have access to bi-annual donor reports populated with your school's real-time financial data.

With our Donor Confidence Report Suite, you'll choose the report type that best fits your fundraising strategy and our services team will ensure you receive an efficient, accurate, and well-designed output.

Unlike generic fundraising tools, our reports are grounded in your unique financial profile, giving your donors a clear picture of where their support goes.
